

REDEFINING CEILINGS

At Nova Ceilings, we create ceiling tiles that make your life easier. Our recyclable, five-layer Nova SmartPeel Ceiling Tiles provide you with cleaner, safer, brighter, and more efficient environments. We help you save time, money, reduce labor costs, maintenance costs, chemical usage, and landfill waste. Our products are innovative, entrepreneurial inventions that provide a breakthrough method for the laborious task of cleaning ceilings. The ceiling tiles allow you to easily peel off a layer to reveal a new, clean surface up to five times.

Join us as we redefine ceilings.

INDUSTRIES WE SERVE

- ▶ CLEAN ROOMS
- ▶ DATA CENTERS
- ▶ COMMERCIAL KITCHEN
- ▶ MANUFACTURING
- ▶ LABORATORY
- ▶ MEDICAL FACILITIES

REDEFINING CEILINGS

PEEL.
RECYCLE.
REPEAT.

QUICK & EASY

Cleaning ceilings is not a simple task, but we make it easy. In 15 seconds, you can have a contaminate-free surface. Just peel away one of the five layers to reveal a new, clean ceiling tile. It's that easy. If you're looking to cut down on your ceiling cleaning time, we have the best solution for you.

SAFE & RECYCLABLE

We invented our ceiling tiles with safety and environmental friendliness in mind. Our products eliminate the need for harsh chemicals for cleaning, reduce airborne particulates, and have received a fire rating of F1/Class A. Built with PET, the world's most recyclable material, the ceiling tile layers minimize landfill waste and eliminate the continuous disposal of dirty ceiling tiles.

SAVE MONEY

Our ceiling tiles have a significant financial impact on your ceiling tile lifecycle. The tiles decrease labor time and costs, reducing the time spent cleaning each tile from 15 minutes to 15 seconds. Each layer can go longer between cleaning than your traditional tile. Maintenance costs also decrease, both for the price of maintenance employees, professional cleaning services, and chemical costs.

CLEANER. BRIGHTER. BETTER. FASTER.

SmartPeel Nova Ceiling Tiles are ideal for clean room environments such as labs, kitchens, hospitals, and manufacturing facilities. Our tiles achieve health code compliance and enhance lighting through a 95% reflectivity rate. They provide substantial barriers against moisture, heat, gases, oils, and grease to maintain cleaner ceilings for extended periods of time. Unlike traditional cleaning methods that require removing tiles and cleaning them separately, our peelable layers reduce the risk of releasing particulates into the environment.

BUILT ON INNOVATION

Led by innovation and curiosity, we strive to create products that enhance the way our clients do business. With a task like cleaning ceiling tiles, we knew there had to be a better way. Our culture of innovation, not settling, and refinement, drives our passion for changing the way people think about everyday products and processes.
